

REFRIGERANT PUMPS

German company Hermetic-Pumpen is a leader in developing and producing secure hermetic centrifugal pumps for refrigerating, chemical, petroleum, nuclear, pharmaceutical and food industries.

Hermetic product line is presented by pumps of CNF types (single stage pumps) and CAM (multistage pumps).

Pumps CNF type are partially well suited to applications where low delivery pressures up to 60 m³/h and higher fluid flow rates are required. This range of pumps has 1 rotor that has a diameter with a pitch of 1 mm.

Pumps CAM(R) type are partially well suited to applications where high delivery pressure up to 140 m³/h and lower fluid flow rates are required. This range of pumps has from 2 to 6 rotors, suction pipe performance can be axial or radial for compatibility with WITT pumps

Pump Series CNF

Operating range:
Capacity Q: max. 50 m³/h
Head H: max. 57 m.c.l.

Pump Series CAM

Operating range:
Capacity Q: max. 35 m³/h
Head H: max. 130 m.c.l.

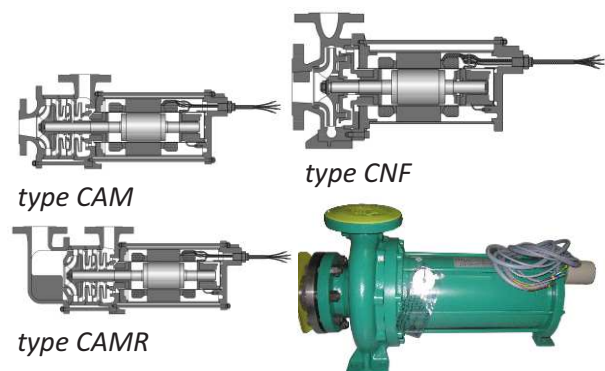

Hermetic pump CAM 1/3

- German quality HERMETIC-Pumpen
- Singlestage and multistage pumps
- Wide range of products that meets any discharge and expenditure requirements
- Variety of additional options
- Standard and explosion proof design
- Reliable supplies from Germany directly to your company
- Permanent service support and availability of spare parts in stock

Hermetic pump CAMR 2/3

Hermetic pump CNF 50-200

Cooltech is the only official distributor of pumping equipment for refrigerating industry in Russia. We organize drop shipments of Hermetic production to any place in the world and exclusively in Russia and CIS countries.
